International Journal of Forecasting 5 (1989) 639–641
North-Holland

AUTHOR INDEX VOLUME 5 (1989)

(The issue number is given in parentheses)

Allon, J., *see* **D. Pfeffermann** (1) 83– 98
Armstrong, J.S., Combining forecasts: The end of the beginning or the beginning of the end? (4) 585–588
Armstrong, J.S., *see* **S. Dakin** (2) 187–194
Ascher, W., Beyond accuracy (4) 469–484
Ayton, P., *see* **G. Wright** (1) 117–125

Bartolomei, S.M. and **A.L. Sweet**, A note on a comparison of exponential smoothing methods for forecasting seasonal series (1) 111–116
Bos, T., *see* **P. Newbold** (4) 523–527
Bretschneider, S.I., W.L. Gorr, G. Grizzle and **E. Klay**, Political and organizational influence on the accuracy of forecasting state government revenues (3) 307–319
Butterfield, D.W., *see* **S.N. Chami** (1) 49– 58

Cassidy, G., M.S. Kamlet and **D.S. Nagin**, An empirical examination of bias in revenue forecasts by state governments (3) 321–331
Chaffin, W.W. and **W.K. Talley**, Diffusion indexes and a statistical test for predicting turning points in business cycles (1) 29– 36
Chami, S.N. and **D.W. Butterfield**, The implications of myopic policy-making for macroeconomic performance (1) 49– 58
Clemen, R.T., Combining forecasts: A review and annotated bibliography (4) 559–583
Clemen, R.T. and **J.B. Guerard, Jr.**, Econometric GNP forecasts: Incremental information relative to naive extrapolation (3) 417–426

Dakin, S. and **J.S. Armstrong**, Predicting job performance: A comparison of expert opinion and research findings (2) 187–194
Damodaran, A., *see* **W.R. Landsman** (4) 491–500
Diebold, F.X., Forecast combination and encompassing: Reconciling two divergent literatures (4) 589–592

Easingwood, C.J., An analogical approach to the long term forecasting of major new product sales (1) 69– 82

Flores, B.E., The utilization of the Wilcoxon test to compare forecasting methods: A note (4) 529–535
Fullerton, Jr., T.M., A composite approach to forecasting state government revenues: Case study of the Idaho sales tax (3) 373–380

Gorr, W.L., *see* **S.I. Bretschneider** (3) 307–319
Grizzle, G., *see* **S.I. Bretschneider** (3) 307–319
Guerard, Jr., J.B., *see* **R.T. Clemen** (3) 417–426

Hafer, R.W. and **R.G. Sheehan**, The sensitivity of VAR forecasts to alternative lag structures (3) 399–408
Hanke, J., Forecasting in business schools: A follow-up survey (2) 259–262
Hogarth, R.M., On combining diagnostic 'forecasts': Thoughts and some evidence (4) 593–597
Holloway, T.M., Measuring the cyclical sensitivity of federal receipts and expenditures: Simplified estimation procedures (3) 347–360

Kamlet, M.S., *see* **G. Cassidy** (3) 321–331
Kettani, O., *see* **M. Oral** (1) 59– 68
Klay, E., *see* **S.I. Bretschneider** (3) 307–319
Krishnamurthi, L., J. Narayan and **S.P. Raj**, Intervention analysis using control series and exogenous variables in a transfer function model: A case study (1) 21– 27

Landsman, W.R. and **A. Damodaran**, A comparison of quarterly earnings per share forecasts using James–Stein and unconditional least squares parameter estimators (4) 491–500
Ledolter, J., The effect of additive outliers on the forecasts from ARIMA models (2) 231–240
Lefrançois, P., Allowing for asymmetry in forecast errors: Results from a Monte-Carlo study (1) 99–110
Lefrançois, P., Confidence intervals for non-stationary forecast errors: Some empirical results for the series in the M-competition (4) 553–557
Lesage, J.P., Incorporating regional wage relations in local forecasting models with a Bayesian prior (1) 37– 47
